

California Earthquake Prediction Evaluation Council (CEPEC)

THE CALIFORNIA EARTHQUAKE PREDICTION EVALUATION COUNCIL

Special Workshop On:

July 2, 2009

NOON to 5:00 P. M.

California Institute of Technology Campus
525 South Wilson Avenue
Pasadena, CA 91106

AGENDA

[NOTE: Times are approximate. The chairman may alter the hearing start time or agenda item order during the meeting]

- | | | |
|------|---|--------------|
| I. | Call to Order (Parrish) | [NOON] |
| II. | Roll Call and Declaration of a Quorum | |
| III. | Chairman's Report [Information] | [1:05 P. M.] |
| IV. | Declare and Move to Executive Session (Closed to Public)
The Council will adjourn to Executive Session | [1:10 P. M.] |
| | New Business [Possible Action] | [1:11 P. M.] |

- Re-examination of current understandings of earthquake activity and history, and fault segmentation as per UCERF2. Possible presentations by Andy Michael and Morgan Page, and discussions of new approaches for determining foreshock probabilities.

- Preparation of pre-event background scenarios for ready reference by CEPEC when considering an active or on-going event, such as the recent cluster of earthquakes at Bombay Beach, or in the policy and science arena, the occurrence of a M6.5+ somewhere along the Cascadia Subduction Zone that might be a foreshock of a larger event that may affect California.

V. Reopen Public Session

VI. Announcements of Future Meetings

VII. Adjournment

[5:00 P. M.]
