

Distinguishing Noninterpretive, Interpretive and New Interpretive USGS Information Products

When applying these distinctions, if there is doubt about whether a product is new interpretive, or if the product might be considered new interpretive by others, contact a Bureau Approving Official (BAO) in the USGS Office of Science Quality and Integrity (OSQI) for a determination.

¹ May be approved for dissemination at the Science Center.

² Must be approved for dissemination by a BAO in OSQI.
