CAMEROON [ADVANCE RELEASE]

THE MINERAL INDUSTRY OF CAMEROON

By Philip A. Szczesniak

In 2017 and 2018, the economy of Cameroon was largely dependent on exports of the country's principal mineral export commodities, notably natural gas, crude petroleum, and refined petroleum (International Monetary Fund, 2019, p. 8–10). The legislative framework for the mineral sector in Cameroon is provided by law No. 2016/017 and law No. 1999-013. Data on mineral production are in table 1. Table 2 is a list of major mineral industry facilities. More-extensive coverage of the mineral industry of Cameroon can be found in previous editions of the U.S. Geological Survey Minerals Yearbook, volume III, Area Reports—International—Africa and the Middle East,

which are available at <https://www.usgs.gov/centers/nmic/africa-and-middle-east>.
