## ALUMINUM IN SEPTEMBER 2023

Domestic primary aluminum production in September 2023 was 60,000 metric tons ( t ). The average daily production in September 2023 was $1,990 \mathrm{t}$, unchanged from that in August 2023, essentially unchanged from that in September 2022, and $17 \%$ less than that in September 2021 (fig. 1, table 1).

Total aluminum recovered from scrap in September 2023 was 274,000 t, slightly less than that in August 2023, unchanged from that in September 2022, and slightly less than that in September 2021. Of this, 151,000 t of aluminum was recovered from new scrap, and 123,000 t was recovered from old scrap (fig. 1, table 1).

Figure 1. Monthly domestic primary and secondary aluminum production from September 2021 through September 2023.

## Prices and Stocks

The September 2023 average U.S. spot market price of primary aluminum ingot was $\$ 1.19$ per pound, essentially unchanged from that in August 2023, 5\% less than that in September 2022, and 27\% less than that in September 2021. The average cash price in September 2023 of primary aluminum ingot on the London Metal Exchange (LME) was $\$ 0.99$ per pound, slightly more than that in August 2023, slightly less than that in September 2022, and 23\% less than that in September 2021 (fig. 2, table 6).

Inventories of primary aluminum in LME-approved warehouses, including off-warrant inventories, in the United

States were 8,645 t at the end of September 2023, more than double (138\%) that at the end of August 2023. Inventories of secondary aluminum (North American Secondary Aluminum Alloy Contract) in LME-approved warehouses, including offwarrant inventories, in the United States were $620 t$ at the end of September 2023, unchanged from that at the end of August 2023 (London Metal Exchange Ltd., 2023a-d).

## U.S. Trade

Total imports of aluminum for consumption for the first 9 months of 2023 decreased by $12 \%$ compared with those in the same period of 2022. Imports of crude metal and alloys, and semi-fabricated products decreased by $8 \%$ and $32 \%$, respectively, but scrap imports increased by $7 \%$. The leading sources of total aluminum imports in the first nine months of 2023 were Canada (58\%), the United Arab Emirates (9\%), and Mexico (5\%). For crude metal and alloy imports, the leading sources were Canada (68\%), the United Arab Emirates (13\%), and Australia (7\%). For semi-fabricated products, the leading sources were Canada (21\%), China, including Hong Kong (13\%), and the Republic of Korea (9\%). For scrap, the leading sources were Canada (58\%) and Mexico (32\%) (table 8).
Total exports of aluminum increased by $22 \%$ during the first 9 months of 2023 compared with those in the same period of
2022. Exports of crude metal and alloys, semi-fabricated products, and scrap increased by $67 \%$, $74 \%$, and $4 \%$ respectively. The leading destinations for total aluminum products during the first 9 months of 2023, in descending order of quantity, were Mexico (19\%), Canada (17\%), Malaysia (16\%), India (15\%), and the Republic of Korea (9\%). For scrap, the leading destinations were India (23\%), Malaysia (17\%), the Republic of Korea (13\%), China, including Hong Kong (11\%), and Thailand (10\%). Scrap accounted for $63 \%$ of all aluminum exports during the first 9 months of 2023 (table 9).

## Updates

On October 27, Federal Metals Co., Inc. (Bedford, OH) opened a new aluminum-copper radiator recycling plant in Little Rock, AR. The $\$ 17.6$ million plant has the capacity to recycle $3,000 \mathrm{t}$ of aluminum-copper radiators per month. Federal Metals specialized in manufacturing a post-consumer aluminum product intended for rolling mills. The facility was projected to employ 40 workers over the next 4 years (Federal Metals Co., Inc., 2023; Voloschuk, 2023).

On November 8, Century Aluminum Co. (Chicago, IL) and the United Steelworkers representing workers at the Century Sebree primary aluminum smelter, formally ratified a five-year labor agreement. Located in Robards, KY, the Sebree smelter has production capacity of 220,000 metric tons per year ( $\mathrm{t} / \mathrm{yr}$ ). The contract covers 460 hourly-workers and is effective until October 28, 2028 (Century Aluminum Co., 2023; Nicoll, 2023).

On November 14, Vedanta Aluminum Ltd. (India) announced that it had shipped 300 t of low-carbon aluminum billets, reportedly a first for India, to Global Aluminium Pvt. Ltd. (India). The Restora-branded aluminum was produced at Vendata's aluminum smelter in Jharsuguda, India, will be used by Global Aluminium to manufacture extrusion profiles (Vedanta Aluminum Ltd., 2023).

On November 16, Norsk Hydro ASA (Norway) inaugurated a new $\$ 150$ million recycling plant in Cassopolis, MI. The plant will produce Hyrdo CIRCAL, Norsk Hydro’s brand of lowcarbon recycled aluminum, containing at least $75 \%$ postconsumer scrap. With a capacity of $120,000 \mathrm{t} / \mathrm{yr}$ of aluminum extrusion ingot, it will largely serve the automotive industry. Norsk Hydro owns and operates eleven recycling plants within the United States and one in Canada (Norsk Hydro ASA, 2023).

On November 21, Emirates Global Aluminum PJS (United Arab Emirates) announced that construction had begun on a new aluminum recycling plant located adjacent to its smelter in Al Taweelah, United Arab Emirates. The facility would produce $170,000 \mathrm{t} / \mathrm{yr}$ of low-carbon recycled aluminum sourced from post-consumer scrap and pre-consumer extrusion production scrap. Construction was planned for completion in three years and will reportedly become the United Arab Emirates's largest aluminum recycling facility (Emirates Global Aluminum PJS, 2023; Wookey 2023).

On December 1, Rio Tinto Group (United Kingdom) announced that it has formed a joint venture with the Giampaolo Group (Italy), by acquiring a 50\% stake in Matalco, Inc. (Canada), a manufacturer of recycled aluminum billet and slab products. The transaction amounting to $\$ 700$ million, has received all regulatory approvals. Matalco operates six facilities
in the United States and one in Canada with a combined production capacity of approximately $900,000 \mathrm{t} / \mathrm{yr}$ (Rio Tinto Group, 2023).
