MARKETABLE PHOSPHATE ROCK JUNE 2025

U.S. marketable phosphate rock production in June was 1.62 million metric tons (Mt), 18% lower than that in May and 9% lower than that in June 2024 (table 1). Total production in January through June was 9.77 Mt, compared with 9.67 Mt in the same period of 2024.

Phosphate rock sold or used in the United States in June was 1.34 Mt, 9% lower than that in May and 17% lower than that in June 2024. Total sold or used in January through June was 8.67 Mt, 9% lower than the revised amount in same period of 2024. U.S. producer stocks in June were 8.17 Mt, 4% higher than those in May and 15% lower than those in June 2024 (table 1).

Imports of phosphate rock in June were 321,000 metric tons, 4% higher than those in May and 27% higher than those in June 2024 (table 2). Total imports in January through June were 1.76 Mt, 3% higher than those in the same period of 2024. Imports of phosphate rock can vary substantially from month to month based on sales contracts and production schedules of the phosphate plants.

Estimated apparent consumption for 2025, based on annualized sold or used and import data, was 21.0 Mt, compared with 22.4 Mt in 2024 (table 3).

A worksheet has been added to the excel table files that includes a macro to remove text from data cells. This will allow users to only have numbers in data cells. Please see the worksheet titled `RemoveTextButton` for instructions in how to use the tool. Note: you must download the excel file in order to use the tool.
