TIN IN JANUARY 2026

Domestic reported consumption of primary refined tin in January 2026 was 1,180 metric tons (t), a 4 percent increase from that in December 2025, and a 3 percent increase from that in January 2025. Apparent consumption of refined tin in January 2026 was 3,130 t, an 8 percent increase from that in December 2025, and a 30 percent decrease from that in January 2025 (table 1).

Prices

The S&P Global Platts Metals Week average New York dealer price of Grade A tin for January 2026 was \$23.43 per pound, a 21 percent increase from that in December 2025, and a 68 percent increase from that in January 2025. The average London Metal Exchange cash price of Grade A tin for January 2026 was \$22.63 per pound, a 21 percent increase from that in December 2025, and a 69 percent increase from that in January 2025 (fig. 1, table 2).

Figure 1. Average monthly prices for Grade A tin from January 2024 through January 2026. Source: S&P Global Platts Metals Week.

U.S. Trade

Total refined tin imports in January 2026 were 2,540 t, a 17 percent increase from those in December 2025, and a 31 percent decrease from those in January 2025. The leading sources of

refined tin in January 2026 were Bolivia (40 percent), Peru (31 percent), and Indonesia (14 percent). Total refined tin exports in January 2026 were 121 t, an increase of 74 t from those in December 2025 and an increase of 32 t from those in January 2025 (table 4).

Industry Participation

Industry participation is key to the publication of aggregated totals of domestic tin statistics, such as components of U.S. supply and consumption of tin materials.

The U.S. Geological Survey's (USGS) National Minerals Information Center canvasses the nonfuel mining and mineral processing industry in the United States for data on mineral production, consumption, recycling, stocks, and shipments. The data that companies provide are the foundation upon which the USGS builds its minerals information publications. Unless authorization is granted for release, the data furnished are aggregated to avoid disclosing company proprietary data and are treated as confidential by the Department of the Interior.

Companies may report on a monthly, quarterly, semiannual, and (or) annual basis, depending on the frequency of the surveys. Canvass forms are mailed shortly after the end of the reporting period and are requested to be returned within 15 to 30 days. In addition to reporting by paper canvass forms, companies can electronically submit data to contribute to this valuable effort.

Companies already registered with the USGS can sign up to report electronically by selecting the "Sign up" link at <https://mids.er.usgs.gov>. To notify the USGS of a new operation, or for further information on registering for electronic submissions, visit <https://mids.er.usgs.gov>. The surveys that collect data for tin materials include the USGS tin survey, which has canvass codes of C56, C58, C60, C62, C63, and C93. Each survey targets specific participants in the tin supply chain: C56 and C60 for detinners and smelters; C58 for secondary smelters and consumers of lead-base and tin-base scrap; C62 for consumers of tin; C63 for agents, brokers, dealers, importers, and jobbers; and C93 for tin producers. For more information on

how to participate in the tin surveys, please contact Chad Friedline using the contact information listed above.

List Services

List services and web feed subscribers are the first to receive notification of USGS minerals information publications and data releases. For information on how to subscribe, go to <https://www.usgs.gov/centers/national-minerals-information-center/minerals-information-publication-list-services>.

Data Release

This report is considered preliminary and for informational purposes only. Raw data from this and other reports from the National Minerals Information Center are available at <https://www.sciencebase.gov/catalog/item/6a4550bd1ba49bba33a320d2>.

GENERAL INFORMATION

This publication is provided by the National Minerals Information Center (NMIC), U.S. Geological Survey (USGS).

Includes data available through April 27, 2026, unless otherwise noted.

NMIC data included in Excel tables of the Minerals Yearbook Chapters and Minerals Industry Surveys are considered preliminary, for informational purposes only.

Comprehensive data releases and list services for NMIC publications are available at <https://www.usgs.gov/centers/national-minerals-information-center>. Data in these tables may not include granular footnotes.

Unless otherwise noted, totals, United States (U.S.) data, and estimated data are rounded to no more than three significant digits, except prices and unit values; may not add to totals shown. Data may include revisions to previously published data.

FOOTNOTES AND TERMINOLOGY

Year-to-date indicates the sum of all months or quarters for the given year to the given period.

Estimated data contained in a row or column are marked with a superscript "e." Preliminary data contained in a row or column are marked with a superscript "p."

Do, ditto. NA, not available. No., number. W, withheld to avoid closing company proprietary data; included with "other." —, not applicable. <0.5, less than half a unit.

TRADE DATA

Trade data is sourced from the U.S. Census Bureau (<https://usatrade.census.gov/>). "HTS" indicates the Harmonized Tariff Schedule of the United States code. "Schedule B" indicates the Schedule B of the United States number.

Imports refers to "imports for consumption." Import valuation is customs value, free-alongside-ship basis.

Exports refers to "domestic exports." Export valuation is on a free-alongside-ship basis.

CONTACT

For questions on this report, please contact Chad Friedline, cfriedline@usgs.gov.

If you are an industry producer or consumer and would like to contribute to NMIC industry surveys, please contact Samuel Oldham, soldham@usgs.gov.

Table 1. Salient tin statistics.

[Data are in metric tons unless otherwise noted.]

Product	2025	2026, January
Production		
Secondary ^{e, 1}	8,550	712
Consumption		
Primary, reported	14,300	1,180
Secondary, reported	416	25
Apparent ²	39,600	3,130
Imports for consumption		
Refined tin	31,900	2,540
Exports		
Refined tin	829	121
Stocks		
End of period	3,880	3,920
Prices (average cents per pound)³		
Metals Week New York dealer, Grade A	1,597.48	2,343.38
London Metal Exchange cash	1,550.81	2,262.70

¹Includes tin recovered from alloys and tinplate. The detinning of tinplate (coated steel) yields only a small part of the total.

²Defined as secondary production plus imports minus exports.

Table 2. Average tin prices.

[Data are in cents per pound. Source: S&P Global Platts Metals Week.]

Period	Metals Week New York dealer,	London Metal Exchange
	Grade A	Cash
2025	1,597.48	1,550.81
2026, January	2,343.38	2,262.70

Table 3. Tinplate production and shipments in the United States.

[Data are in metric tons unless otherwise noted.]

Period	Tinplate (all forms)		
	Production		
	Gross weight	Tin content	Tin per metric ton of plate (kilograms)
2025	343,000	1,790	5.3
2026, January	27,600	145	5.3

Table 4. U.S. tin imports for consumption and exports.

[Data are in metric tons, gross weight.]

Product and country or locality	2025	2026, January
Imports, refined tin		
Belgium	228	2
Bolivia	7,480	1,000
Brazil	1,350	0
Canada	93	1
Indonesia	2,860	367
Malaysia	830	0
Peru	15,600	793
Poland	1,570	112
Rwanda	425	75
Thailand	583	90
Other	869	94
Total	31,900	2,540
Imports, other		
Alloys	1,210	134
Bars, rods, profiles, and wire	1,130	105
Flakes and powders	102	6
Foil	77	11
Plates, sheets, strip	185	21
Tubes, pipes, and tube and pipe fittings	42	1
Waste and scrap	7,080	598
Miscellaneous ¹	806	86
Exports		
Refined tin	829	121
Alloys	865	30

¹Includes other articles of tin not elsewhere specified or included (Harmonized Tariff Schedule of the United States code 8007.00.5000).

Table 5. Reported consumption of tin in the United States, by finished product.

[Data are in metric tons of contained tin.]

Product	2025	2026, January		
		Primary	Secondary	Total
Alloys (miscellaneous) ¹	1,680	141	0	141
Babbitt	206	14	W	14
Bronze and brass	653	44	10	54
Chemicals	2,730	213	0	213
Solder	1,600	125	W	125
Tinning	230	19	0	19
Tinplate ²	1,810	145	W	145
Other ³	5,820	480	15	495
Total	14,700	1,180	25	1,210

¹Includesterne metal.²Includes secondary pig tin and tin components of tinplating chemical solutions.³Includes bar tin and anodes, britannia metal, collapsible tubes and foil, jewelers' metal, pewter, tin powder, type metal, and white metal.
