CEMENT IN MARCH 2026

This report provides monthly data on the shipments of cement to final customers and the production of clinker in the United States from January 2025 through March 2026. Data on the imports of cement and clinker for March 2026 also are provided.

Total shipments of portland and blended cement, including imports, in the United States and Puerto Rico in March 2026 were an estimated 8.50 million metric tons (Mt), a 5.1 percent increase from shipments in March 2025 (tables 1A, 2A, and 2B). Shipments for the year through March totaled an estimated 21.3 Mt, a 6.5 percent increase from those for the same period in 2025. Of total blended tonnage reported year-to-date in 2026, 12.7 Mt (96 percent) was estimated to be portland-limestone cement (Type IL); the leading destination for Type IL shipments by tonnage was Texas. The leading producing States for portland and blended cement in March 2026 were, in descending order, Texas, Missouri, California, Florida, and Alabama. The leading cement-consuming States (Texas, California, Florida, Arizona, and Georgia, in descending order) received 44.8 percent of shipments in March (tables 2A and 2B).

Masonry cement shipments totaled an estimated 163,000 metric tons (t) in March 2026, an 11.1 percent decrease from those in March 2025 (tables 1B, 2C). Shipments for the year through March totaled an estimated 432,000 t, a decrease of 9.6 percent from those for the same period in 2025. The leading masonry-cement-consuming States in March 2026 were, in descending order, Florida, Texas, Tennessee, California, and North Carolina; these States received 56.3 percent of shipments in March (table 2C).

Clinker production, excluding Puerto Rico, totaled an estimated 5.07 Mt in March 2026, a 1.1 percent increase from that in March 2025. Production for the year through March totaled an estimated 13.7 Mt, a 4.1 percent increase from the

same period in 2025. The leading clinker-producing States in March 2026 were, in descending order, Texas, California, Florida, Missouri, and Alabama (table 4).

Tables 5, 6, and 7 list import data from the U.S. Census Bureau; however, data for clinker imports into the Detroit, MI, and Seattle, WA, customs districts do not include material trucked in from Canada on an informal-entry basis. Monthly imports can show significant year-over-year changes for a variety of reasons and commonly do not correlate well with consumption levels in the respective import districts in the same month. March 2026 imports of cement and clinker, including the San Juan, PR, customs district, totaled 2.16 Mt, a 23.6 percent increase from March 2025. Imports for the year through March totaled 5.24 Mt, an increase of 2.3 percent from those for the same period in 2025.

An estimate for cement imported by independent importers not participating in the USGS surveys is provided (tables 1A, 2A) but import volumes do not correlate well with consumption levels by domestic final customers in many of the respective import districts. Customs districts affected include, but are not limited to, Houston-Galveston, TX; Miami, FL; New Orleans, LA; Philadelphia, PA; Savannah, GA; and Tampa, FL.

List Services

List services and web feed subscribers are the first to receive notification of USGS minerals information publications and data releases. For information on how to subscribe, go to <https://www.usgs.gov/centers/national-minerals-information-center/minerals-information-publication-list-services>.

Cement in March 2026

This workbook includes 7 tables.

GENERAL INFORMATION

This publication is provided by the National Minerals Information Center (NMIC), U.S. Geological Survey (USGS).

Includes data available through August 11, 2026, unless otherwise noted.

NMIC data included in Excel tables of the Minerals Yearbook Chapters and Minerals Industry Surveys are considered preliminary, for informational purposes only.

Comprehensive data releases and list services for NMIC publications are available at <https://www.usgs.gov/centers/national-minerals-information-center>.

Data in these tables may not include granular footnotes.

Unless otherwise noted, totals, United States (U.S.) data, and estimated data are rounded to no more than three significant digits, except prices and unit values; may not add to totals shown. Data may include revisions to previously published data.

FOOTNOTES AND TERMINOLOGY

Year-to-date indicates the sum of all months or quarters for the given year to the given period.

Estimated data contained in a row or column are marked with a superscript “e.” Preliminary data contained in a row or column are marked with a superscript “p.”

Do, ditto. NA, not available. No., number. W, withheld to avoid disclosing company proprietary data. —, not applicable. <0.5, less than half a unit.

TRADE DATA

Trade data are sourced from the U.S. Census Bureau (<https://usatrade.census.gov/>). "HTS" indicates the Harmonized Tariff Schedule of the United States code.

"Schedule B" indicates the Schedule B of the United States number.

Imports refers to "imports for consumption." Import valuation is cost, insurance, and freight.

CONTACT

For questions on this report, please contact Ashley Hatfield, ahatfield@usgs.gov

If you are an industry producer or consumer and would like to contribute to NMIC industry surveys, please contact Hoa Phamdang, hphamdan@usgs.gov.

¹May include revisions to previously published data.

²Does not include sales of imported cement likely destined to “Texas, southern” by companies that do not report to the USGS.

³Includes estimates for nonrespondents or facilities that provided incomplete information; data have been rounded to three significant digits.

⁴As reported by domestic and Canadian cement manufacturers and other importers. Includes U.S. possessions and territories.

⁵Data may not add to totals shown because of independent rounding.

⁶Based on trade data (Table 5), an estimated additional 1.9 Mt (full year 2025) and an estimated additional 0.5 Mt (year-to-date 2026) of cement were imported by independent importers not participating in the USGS surveys. Import volumes do not correlate well with consumption levels by domestic final customers in many of the respective import districts.

¹May include revisions to previously published data.²Does not include sales of imported cement likely destined to “Texas, southern” by companies that do not report to the USGS.³Includes estimates for nonrespondents or facilities that provided incomplete information; data have been rounded to three significant digits.⁴As reported by domestic and Canadian cement manufacturers and other importers. Includes U.S. possessions and territories.⁵Data may not add to totals shown because of independent rounding.⁶Based on trade data (Table 5), an estimated additional 1.9 Mt (full year 2025) and an estimated additional 0.5 Mt (year-to-date 2026) of cement were imported by independent importers not participating in the USGS surveys. Import volumes do not correlate well with consumption levels by domestic final customers in many of the respective import districts.

Table 2b. Blended cement shipments, by destination, January 2025–March 2026.

[Includes imported cement and cement manufactured from imported clinker. Data are in metric tons. Blended cement defined per ASTM standard C59]
