CEMENT IN JULY 2026

This report provides monthly data on the shipments of cement to final customers and the production of clinker in the United States from January 2025 through July 2026. Data on the imports of cement and clinker for July 2026 also are provided.

Total shipments of portland and blended cement, including imports, in the United States and Puerto Rico in July 2026 were an estimated 10.1 million metric tons (Mt), a 1.4 percent increase from shipments in July 2025 (tables 1A, 2A, and 2B). Shipments for the year through July totaled an estimated 59.7 Mt, a 4.5 percent increase from those for the same period in 2025. Of total blended tonnage reported year-to-date in 2026, 35.4 Mt (94 percent) was estimated to be portland-limestone cement (Type IL); the leading destination for Type IL shipments by tonnage was Texas. The leading producing States for portland and blended cement in July 2026 were, in descending order, Texas, Missouri, California, Florida, and Michigan; these States accounted for 38.2 percent of cement produced (table 1A). The leading cement-consuming States (Texas, California, Florida, Ohio, and Illinois, in descending order) received 37.7 percent of shipments in July (tables 2A and 2B).

Masonry cement shipments totaled an estimated 173,000 metric tons in July 2026, a 13.8 percent decrease from those in July 2025 (tables 1B, 2C). Shipments for the year through July totaled an estimated 1.13 Mt, a decrease of 9.6 percent from those for the same period in 2025. The leading masonry-cement-consuming States in July 2026 were, in descending order, Florida, Texas, Georgia, North Carolina, and California; these States received 51.9 percent of shipments in July (table 2C).

Clinker production, excluding Puerto Rico, totaled an estimated 6.48 Mt in July 2026, a 4.2 percent decrease from that in July 2025. Production for the year through July totaled an estimated 39.7 Mt, a 4.2 percent increase from the same period in 2025. The leading clinker-producing States in July 2026 were, in descending order, Texas, Missouri, California, Florida, and Alabama (table 4).

Tables 5, 6, and 7 list import data from the U.S. Census Bureau; however, data for clinker imports into the Detroit, MI, and Seattle, WA, customs districts do not include material trucked in from Canada on an informal-entry basis. Monthly imports can show significant year-over-year changes for a variety of reasons and commonly do not correlate well with consumption levels in the respective import districts in the same month. July 2026 imports of cement and clinker, including the San Juan, PR, customs district, totaled 2.57 Mt, a 3.3 percent increase from July 2025. Imports for the year through July totaled 15.1 Mt, an increase of 1.3 percent from those for the same period in 2025.

An estimate for cement imported by independent importers not participating in the USGS surveys is provided (tables 1A, 2A) but import volumes do not correlate well with consumption levels by domestic final customers in many of the respective import districts. Customs districts affected include, but are not limited to, Houston-Galveston, TX; Miami, FL; New Orleans, LA; Philadelphia, PA; Savannah, GA; and Tampa, FL.

List Services
List services and web feed subscribers are the first to receive notification of USGS minerals information publications and data releases. For information on how to subscribe, go to https://www.usgs.gov/centers/national-minerals-information-center/minerals-information-publication-list-services.

Data Release
This report is considered preliminary and for informational purposes only. Raw data from this and other reports from the National Minerals Information Center are available at https://www.sciencebase.gov/catalog/item/6a4550bd1ba49bba33a320d2.

Cement in July 2026

This workbook includes 7 tables.

GENERAL INFORMATION

This publication is provided by the National Minerals Information Center (NMIC), U.S. Geological Survey (USGS).

Includes data available through October 28, 2026, unless otherwise noted.

NMIC data included in Excel tables of the Minerals Yearbook Chapters and Minerals Industry Surveys are considered preliminary, for informational purpos

Comprehensive data releases and list services for NMIC publications are available at https://www.usgs.gov/centers/national-minerals-information-center.

Data in these tables may not include granular footnotes.

Unless otherwise noted, totals, United States (U.S.) data, and estimated data are rounded to no more than three significant digits, except prices and unit values; may not add to totals shown. Data may include revisions to previously published data.

FOOTNOTES AND TERMINOLOGY

Year-to-date indicates the sum of all months or quarters for the given year to the given period.

Estimated data contained in a row or column are marked with a superscript “e.” Preliminary data contained in a row or column are marked with a superscrip

Do, ditto. NA, not available. No., number. W, withheld to avoid disclosing company proprietary data. —, not applicable. <0.5, less than half a unit.

TRADE DATA

Trade data are sourced from the U.S. Census Bureau (https://usatrade.census.gov/). "HTS" refers to the Harmonized Tariff Schedule of the United States, and "Schedule B" refers to the Schedule B export classification system used by the United States.

"Imports" refers to "imports for consumption." The import valuation is the U.S. customs value, as appraised by the U.S. Customs and Border Protection, and is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States.

"Exports" refers to "domestic exports." Export valuation is on a free-alongside-ship basis.

CONTACT

For questions on this report, please contact Ashley Hatfield, ahatfield@usgs.gov.

If you are an industry producer or consumer and would like to contribute to NMIC industry surveys, please contact Hoa Phamdang, hphamdan@usgs.gov.

[1]May include revisions to previously published data.
[2]Does not include sales of imported cement likely destined to "Texas, southern" by companies that do not report to the USGS.
[3]Includes estimates for nonrespondents or facilities that provided incomplete information; data have been rounded to three significant digits.
[4]As reported by domestic and Canadian cement manufacturers and other importers. Includes U.S. possessions and territories.
[5]Data may not add to totals shown because of independent rounding.
[6]Based on trade data (Table 5), an estimated additional 1.9 Mt (full year 2025) and an estimated additional 1.4 Mt (year-to-date 2026) of cement were imported by independent importers not participating in the USGS surveys. Import volumes do not correlate well with consumption levels by domestic final customers in many of the respective import districts.

Table 2a—Continued. Portland cement shipments, by destination, January 2025–July 2026.
[Includes imported cement and cement manufactured from imported clinker. Data are in metric tons.]

[1]May include revisions to previously published data.

[2]Does not include sales of imported cement likely destined to "Texas, southern" by companies that do not report to the USGS.

[3]Includes estimates for nonrespondents or facilities that provided incomplete information; data have been rounded to three significant digits.

[4]As reported by domestic and Canadian cement manufacturers and other importers. Includes U.S. possessions and territories.

[5]Data may not add to totals shown because of independent rounding.

[6]Based on trade data (Table 5), an estimated additional 1.9 Mt (full year 2025) and an estimated additional 1.4 Mt (year-to-date 2026) of cement were imported by independent importers not participating in the USGS surveys. Import volumes do not correlate well with consumption levels by domestic final customers in many of the respective import districts.

Table 2a—Continued. Portland cement shipments, by destination, January 2025–July 2026.
[Data are unrounded but are thought to be accurate to no more than three significant digits. Includes imported cement and cement manufactured from imported clinker. Data are in metric tons.]

[1]May include revisions to previously published data.
[2]Of total blended tonnage reported, sales of portland-limestone cement (Type IL) year-to-date.
[3]Does not include sales of imported cement likely destined to "Texas, southern" by companies that do not report to the USGS.
[4]Includes U.S. possessions and territories.
[5]Data may not add to totals shown because of independent rounding.

Table 2b—Continued. Blended cement shipments, by destination, January 2025–July 2026.
[Includes imported cement and cement manufactured from imported clinker. Data are in metric tons. Blended cement defined per ASTM standard C595.]

[1]May include revisions to previously published data.
[2]Of total blended tonnage reported, sales of portland-limestone cement (Type IL) year-to-date.
[3]Does not include sales of imported cement likely destined to "Texas, southern" by companies that do not report to the USGS.
[4]Includes U.S. possessions and territories.
[5]Data may not add to totals shown because of independent rounding.

Table 2c. Masonry cement shipments, by destination, January 2025–July 2026.
[Includes imported cement and cement manufactured from imported clinker. Data are in metric tons.]
